

PL1/K1 Portable Induction Loop

Features:

- All In One System
- Attractive Design
- Portable And Robust
- Excellent Sound Quality
- Free-standing lightweight design
- Ready For Use In Seconds

Portable Induction Loop

Made from durable ABS plastic, the PL1/K1 is lightweight and tough enough to be transported and an integral battery allows the unit to be used in most environments. The unit will cover an area of 1 ~ 2 m² and uses an integral microphone to pick up speech and conversations, (however an external microphone may be added if required).

A built-in 'cut-off timer' automatically shuts down the system after 10, 30, 60 minutes if the unit is not being used, helping to maintain battery life for prolonged use (Suitable for one to one and small group situations).

Fully compliant with BS7594 and EN60118-4, it is ideal for use in schools, shops, nursing homes, leisure centres, hotels, banks, GP surgeries, reception desks and many other private, public and civic applications.

Coverage	1m Operating Range At 1KHz
Battery Type	Internal 12V VRSLA Battery
Internal Mic	0.5m Optimum Operating Distance
Remote Mic Socket	3.5mm Mono Jack
Frequency Response	100Hz-5KHz
Compressor	Fully Automatic (Up To 5:1 Max)
Dimensions (WxHxD)	250x300x100mm
Weight	1.7kg
